

Jonathan Borofsky | FULLSTACK SOFTWARE ENGINEER

Wichita, KS | jonborofsky@gmail.com | 502-777-6830 | [LinkedIn](#) | [GitHub](#)

ABOUT ME

I am a Fullstack Software Engineer skilled in the PERN stack. I have eight years of banking and mortgage services experience where I learned to creatively solve complex problems. I am excited to bring my passion for solving complex business challenges by utilizing my software development skills to create powerful and engaging software.

TECHNICAL SKILLS

Front-end: Javascript ES6, React, HTML5, CSS3

Back-end: Express, PostgreSQL, Node.js, ElephantSQL, DBeaver

Additional: RESTful APIs, Unit Testing, Algorithms, Data Structures, Github, Git, Postman, Heroku, Slack, Zoom

SOFTWARE ENGINEERING PROJECTS

Flashcard-o-matic | [Project Link](#)

- Developed a flash card application used by teachers and students to create decks of flash cards for various subjects, stores them in an api, and retrieves them to be studied.
- Designed a relational database and RESTful API for the backend with different endpoints utilizing CRUD operations..
- Built using Javascript, React, Bootstrap, and HTML.

WeLoveMovies API | [Project Link](#)

- Developed the Express endpoints for a movie application that allows users to search for movies, ratings, and a listing of theaters where the movies are currently showing
- Designed a relational database and RESTful API for the backend with different endpoints utilizing CRUD operations..
- Built using React, Bootstrap, Node, Express, Knex, PostgreSQL,/ElephantSQL, and DBeaver.

Pomodoro Timer | [Project Link](#)

- Developed a web application allowing users to set focus and break timers in a single Pomodoro Method session.
 - Designed interactive UI components that allow users to customize their app experience.
 - Implemented a React-based design utilizing JSX, DOM manipulation, and React state management.
 - Built using Javascript, React, Node.js, HTML, and CSS.
-

ADDITIONAL EXPERIENCE

Fidelity Bank, Wichita KS - *Mortgage Loan Processor*

September 2017 - July 2021

- Increased the profitability of the mortgage loan department by personally processing over 40 mortgages per month, totaling over \$100 million in new mortgages per year.
- Led testing and training during the development of a new Mortgage Loan Origination System to be used by multiple departments within the bank.
- Educated home buyers with expert knowledge in all consumer mortgage products, including conventional FHA, USDA, and VA mortgage guidelines.

Credit Union of America, Wichita KS - *Financial Services Representative*

September 2012 - September 2017

- Educated members and potential new members on a variety of banking services while consistently achieving a top 3 rank in product sales across the entire credit union while adding over \$10,000,000 per year in new revenue to the credit union.
 - Gained client trust by advising relevant products personally useful to the member.
 - Served as a trusted subject matter expert on IRA, online banking, and investment products.
-

EDUCATION

Thinkful Apprenticeship - Fullstack Software Engineering Certification

2021

An intensive 50-60 hour/week course where I built responsive, accessible web apps using the PERN stack. Emphasis on remote group work, utilizing personal skill and project collaboration with a diverse cohort of varying skill-levels and backgrounds.

Boyce College - B.S. Religious Education

2011
